RELEVANT EXPERIENCE

Full Stack Developer Jan 2026 - Present

- Hands-on experience with modern frontend frameworks and backend languages
- Solid understanding of RESTful APIs, databases, and version control using Git
- Write clean, maintainable code and participate in code reviews

Product Designer Dec 2023 - Jul 2025

- Translate product requirements and user insights into wireframes, prototypes, and high-fidelity designs
- Proficiency in Figma; familiarity with prototyping and user testing

SELECTED WORKS

Founder & Developer | **Chalk** Mar - May 2026

- Built a desktop productivity app using React, Electron, Node.js, and Supabase, featuring habit tracking, goal planning, and journaling in one minimal interface
- Architected a PostgreSQL database with Supabase as the backend, implementing real-time data sync and secure user authentication via REST API
- Currently in active alpha, with continuous iterations being shipped as the app evolves

UI / UX Designer & Developer | **Westwood** Jan - Mar 2026

- Built a full-stack rental collection website using HTML5, CSS3, JavaScript, PHP, and MySQL, featuring a public-facing storefront and an admin dashboard for inventory, rental tracking, and analytics
- Designed and developed both the customer-facing UI and business management interface from Figma prototypes to deployment, managing the full lifecycle with Git and GitHub

SKILLS

Programming Languages

JavaScript, TypeScript, Java, PHP, C#

Frameworks & Libraries

React, React Native, Next.js, Express.js, Tailwind CSS, Framer Motion, Tauri, Electron

Tools & Platforms

Git, GitHub, Supabase, Firebase, Vercel, Xampp, Figma

SOFT SKILLS

- Attention to Detail
- Adaptability
- Self - Directed
- Design Thinking
- Time Management
- Collaboration
- Problem Solving
